Changed cardinality of the “classifier” association between *GeologicFeature* and *ControlledConcept* to 1..* (voidable)

Application Schema: *Geomorphology*

Added new attribute to NaturalGeomorphologicFeature: "activity" (0..1). An accompanying placeholder for an ActivityStatus codelist was also added.

Application Schema: *Borehole*

New version 3.1 schema changed to import the updated GeoSciML-Core v3.1 schema.

Application Schema: *Collection*

New version 3.1 schema changed to import the updated GeoSciML-Core v3.1 schema.

Application Schema: *EarthMaterial*

New version 3.1 schema changed to import the updated GeoSciML-Core v3.1 schema.

Application Schema: *GeologicAge*

New version 3.1 schema changed to import the updated GeoSciML-Core v3.1 schema.

Application Schema: *GeologicStructure*

New version 3.1 schema changed to import the updated GeoSciML-Core v3.1 schema.

Application Schema: *GeologicUnit*

New version 3.1 schema changed to import the updated GeoSciML-Core v3.1 schema.

Application Schema: *LaboratoryAnalysis-Specimen*

New version 3.1 schema changed to import the updated GeologicAge v3.1 schema.

Application Schema: *GeoSciML*

New schema added which imports all of the 13 related GeoSciML application schema packages for version 3.1.
